

Weekly Progress Report

Name: Mantasha Md Anish Shaikh

Domain:Core Java Development(Banking Information System)

Date of submission:26/04/2026

Week Ending: 01

I. Overview:

This week, the primary focus was on understanding the fundamentals of Core Java and initiating the development of the Banking Information System project. Efforts were made to design the basic structure of the system and implement initial functionalities such as user registration and account creation.

II. Achievements:

1. Project Understanding & Planning

Studied the problem statement of the Banking Information System.

Identified key modules such as User, Account, Transaction, and Bank.

Designed the overall system flow and structure.

2. Core Java Implementation

Name of the project: Banking Information System

Developed initial Java classes (User, Account, Transaction).

Implemented user registration functionality.

Generated unique account numbers for each user.

Created basic console-based interface for interaction.

3. Learning Core Java Concepts

Gained understanding of Object-Oriented Programming (OOP).

Practiced concepts like Classes, Objects, and Methods.

Learned basic use of Java Collections (ArrayList).

III. Challenges:

1. System Design Complexity

Faced difficulty in structuring multiple classes and their relationships.

Required extra effort to understand how different modules interact.

2. Input Handling

Encountered issues while managing user input using Scanner.

Worked on improving input validation and avoiding runtime errors.

IV. Learning Resources:

1. Java Learning Materials

Referred to online tutorials and documentation for Core Java basics.

Practiced coding examples to strengthen understanding of OOP concepts.

2. Practical Learning

Implemented small code snippets to test logic before integrating into the project.

Used IDE tools (Eclipse/IntelliJ) for debugging and execution.

V. Next Week's Goals:

1. Feature Development

Implement Deposit and Withdrawal functionalities.

Add login system with password authentication.

2. System Enhancement

Improve error handling (invalid inputs, insufficient balance).

Begin implementation of transaction history (Account Statement).

VI. Additional Comments:
