

Weekly Progress Report

Name: Mantasha Md Anish Shaikh

Domain:Core Java Development(HRMS & Expense Tracker System)

Date of submission:04/05/2026

Week Ending: 03

I. Overview:

This week, the primary focus was on developing a console-based Human Resource Management System (HRMS) along with an Expense Tracker Application using Core Java.

The project aims to manage employee data, attendance, leave records, and personal expenses efficiently through a menu-driven console interface.

II. Achievements:

1. Project Understanding & Planning

Studied both problem statements (HRMS & Expense Tracker).

Identified key modules:

HRMS: Employee, Attendance, Leave

Expense Tracker: Expense, Category

Designed system workflow and menu structure.

2. Core Java Implementation

Name of the Project:

HRMS & Console-based Expense Tracker Application

Developed classes:

Employee

Attendance

Leave

Expense

Implemented:

Employee management (Add, View, Delete)

Attendance tracking system

Leave request system

Expense recording & tracking

Created menu-driven console interface.

Added login authentication system.

3. Learning Core Java Concepts

Strengthened understanding of:

Object-Oriented Programming (OOP)

Classes and Objects

Methods and Constructors

Practiced Java Collections:

ArrayList for data storage

Improved logical thinking and modular coding.

III. Challenges:

1. System Integration

Difficulty in combining HRMS and Expense Tracker in one program.

Managing multiple modules in a single file was complex.

2. Input Handling

Faced issues with Scanner input (nextLine vs nextInt).

Resolved input mismatch and runtime errors.

IV. Learning Resources:

1. Java Learning Materials

Referred to online tutorials and documentation.

Practiced small programs before integration.

2. Practical Learning

Tested each module separately.

Used IDE (IntelliJ / Eclipse) for debugging.

Improved code structure step by step.

V. Next Week's Goals:

1. Feature Enhancement

Add Update Employee functionality

Add Leave approval/rejection system

Improve search functionality

2. System Improvement

Implement File Handling (Data Persistence)

Improve UI formatting in console

Add report generation (monthly summaries)

VI. Additional Comments:
